

## [DIY Wine Glass Snowman](#)

Instructions (and instructional photos) found on [AnnsEntitledLife.com](http://AnnsEntitledLife.com)

### **DIY Wine Glass Snowman Materials**

- 3 Wine Glasses; various, staggered, sizes
- [Enamel Paint](#): White, Black, Peach and Orange were used in this project (options of red for cheeks, blue, green for eye dots would work)
- [Paint Brushes](#)
- Yarn
- [Glue Gun](#)
- Glue Sticks
- [Tea Lights](#) (for decoration)

### **DIY Wine Glass Snowman Instructions:**

- Paint the bowl of your wine glasses white with a flat brush painting up and down in fairly straight lines. Allow to dry.
- Paint the stem and base of your glasses black, let dry.
- Add a second coat of each paint, allow to dry.
- With a pointy paint brush, dip the brush in the black paint and paint circle for the eyes and mouth.
- With the same type of brush (if you are reusing the same brush, clean it first), dip the brush in orange paint and paint five (5) small circles together for the nose, large to small with each size just a bit smaller than the prior size to form the snowman's nose.
- Using a small pointed brush, dip the brush in white paint and put a tiny dot on the eyes.
- Now using your pinky finger as a paint brush, lightly touch the peach paint and paint a fingerprint sized cheek above the ends of the coal smile.
- Now touch up the paint where the bowl meets the stem.

- Let your glasses dry.
- Once your glasses are dry, hot glue a piece of yarn on the top of the glass lip to look like a scarf.
- Top off with a few tea light candles and set in the middle of your table, on your fireplace mantel or an end table for a great winter decoration!
