

## [Make Your Own Snowflake Window Cling](#)

Instructions (and tutorial photos) found on [AnnsEntitledLife.com](#)

### **Snowflake Window Cling Materials:**

- [Light Blue Paint](#)
- [Darker Blue Paint](#)

\*\* **Note:** if you don't already own puffy paints, [this 20 pack](#) is a great price for a starter kit (and has all the colors needed for this project)

- [Page Protector](#)
- [Snowflake Window Cling Template](#)
- 8 1/2" x 11" Paper
- Scissors

### **Snowflake Window Cling Directions:**

- Print out the [snowflake cling template](#). Cut out the general shape.
- Insert a sheet of 8 1/2" x 11" sheet of paper into one of the [page protector](#).
- Place your snowflake picture into the page protector, on top of the whole sheet of paper.
- You are painting on the [page protector](#).
- Begin with the straight lines of the snowflake with the light blue paint.
- Paint all the straight lines before moving on to the smaller snowflake details.
- Make certain your lines of paint are thick; it will make it a lot easier to peel off the snowflake window cling later.
- If some of the areas are too small to paint around, just layer your puffy paint.
- Once the light blue straight lines are completed, switch to the dark blue puffy paint and, working top down, complete the details of the snowflake.
- **Note:** You can use any color combination you like to make the snowflakes. Blue shows well, so that is why it was chosen for this tutorial.
- When finished, set your painted template somewhere where it will not be disturbed.
- Allow to dry for 24 hours.
- Once your snowflake cling is dry, peel it off carefully.
- Your snowflake cling is now ready for you to hang on your window or mirrors.

**Warning:** do not keep snowflake on your windows for an extended period of time or during hot weather as they will be difficult to remove.
