DIY Candy Corn Pots Materials

- 1 ¾ " Terra Cotta pots
- Yellow Yarn
- Orange Yarn
- White Yarn
- Hot Glue Gun
- Hot Glue
- Scissors
- Duct Tape

DIY Candy Corn Pots Instructions

- Hot glue the end of your white yarn to the bottom edge of your terra cotta pot and begin wrapping it around and around until you get about ¼" way up.
- Now continue to wrap your white yarn back down to the bottom of your pot, making a second layer of yarn.
- Once you reach the bottom of your pot, cut the yarn and hot glue the piece of yarn down onto the wrapped white yarn.
- Now repeat steps the last three steps with your orange yarn, starting right where you left off with your white yarn.
- Now repeat steps the first three steps with your yellow yarn for the remaining open area on the pot.
- Measure out 6 pieces of yellow yarn about 14" in length and tie the strands into a knot towards the top.
- Tape the strands onto the table and separate into 3 sections (2 pieces of yarn in each section).

- Braid your strands together then tie the end into a knot.
- Hot glue the braided yarn onto the rim of your pot, trim the knots off the ends and carefully glue the loose ends together on the rim.
- Fill with small Halloween treats, nuts, hard candy, etc.
- You can also use these for real posts for herbs, small indoor plants, etc.
