

### [Felt Wreath Ornament](#)

Instructions and Tutorial Photos found on [AnnsEntitledLife.com](http://AnnsEntitledLife.com)

#### **Felt Wreath Ornament Materials:**

- Green Felt - 3 different shades (optional)
- Scissors
- Small Piece Red Felt
- Green Thread
- Hand Needle
- Glue Gun
- Glue Sticks

#### **Felt Wreath Ornament Directions:**

- Cut green felt into approximately 100  $\frac{3}{4}$ " x  $\frac{3}{4}$ " squares or  $\frac{3}{4}$ " x 1" rectangles (104 were used on the wreath shown). Use 3 different shades for depth. Stack felt on top of one another to save cutting time.
- Mark your felt, and use a ruler to draw a straight line with a pencil if you require a guide.
- Thread a needle with a 13" to 14" piece of green thread.
- If you are worried about possible breakage, double thread a needle with a 13" to 14" piece of green thread. To do this using a 26" to 28" piece of green thread, fold it in half. Push the looped end (where it is folded) through the eye of the needle. This will give your thread double strength. (This tutorial used a double threaded needle.)
- Slide the felt pieces down the thread, pressing them together. Alternate colors, or place two alike colors together.
  
- Continue to add the green felt squares until you have about a 7" length of felt on the thread, and about 6" of thread leftover.
  
- Remove the needle.
  
- Tie the two pieces of thread together tightly and a circle will form. Double knot.

- Tie the remaining thread into a slip knot to hang.
- Cut a piece of red felt 3.5" x 0.25".
- Take that long piece of red felt and fold the ends into the center; affix with hot glue.
- Cut two smaller pieces of red felt, 2" x 0.25".
- Wrap one piece of that 2" x 0.25" red felt around the center of the bow and secure with hot glue. Trim the end.
- Cut the other piece of 2" x 0.25" in half, and affix to the back of the bow with hot glue.
- Attach the red bow to the wreath using hot glue.
- Hang as desired.
