

[Snowman Garland Craft](#)

Instructions and Tutorial Photos found on [AnnsEntitledLife.com](#)

Snowman Garland Craft Materials:

- 12" Ribbon or Yarn
- White Ceramic Christmas Bulbs (how many will depend on the spacing you envision for your garland)
- Black Buttons
- Orange Felt
- Fleece Fabric (color of your choice, how much will depend on how many snowman ornaments you are making)
- Scissors
- Glue Gun
- Glue Sticks
- Twine (to hang)

Snowman Garland Craft Directions:

- Cut a piece of ribbon or yarn 12" in length.
- Fold the ribbon in half and make a slip knot in the hanger portion of the bulb.
- Pull tight.
- *If you cannot find matching or coordinating ribbon for the hanging portion, use a piece of the fabric, about 3/8" wide x 12" long.
- Cut a piece of fabric into a 6.5" wide x 9" long rectangle.
- Fold the fabric about 3/8" over on the long edge and tack with hot glue.
- Roll up once more and tack with hot glue.
- Wrap the fabric-hat around the bulb, making sure the folded end covers the bulb.
- Affix the ends to the bulb with hot glue.
- Using another piece of thread or yarn, tie a string around the fabric to create a hat. Double knot it.
- Trim the top fabric by cutting it vertically being careful not to cut the hanging ribbon/yarn.
- When working on the face, lay the bulb on a glass or shot glass to hold it in place while you attach the facial features.
- Cut out a small triangle nose out of the orange felt.

- Attach two black button eyes to the ornament using hot glue.
- Attach a button mouth with hot glue (see photo).
- Attach the orange triangle nose to the bulb using hot glue.
- Glue the two pieces of ribbon together on the ends.
- Fold them over and glue the end to the ribbon about 2" from the fold, creating a loop.
- If hanging on a tree, use an ornament hook or simply loop the ribbon on a branch so the ornament does not fall off.
- If hanging as garland, slip the loops of the ribbon on the snowman ornaments through a piece of twine and hang where desired!
